

Parent Information Sheet

Your child is being invited to participate in a survey on the status of endometriosis in Israel, initiated by the Endometriosis Association Israel.

Endometriosis Association Israel is a leading organization in the fields of endometriosis and adenomyosis in the country. We believe that by creating knowledge and giving a platform to the voices of patients, we can improve the quality of treatment for this condition.

In November 2021, the association launched the large Endo Survey – a comprehensive, in-depth survey addressing key issues related to endometriosis: diagnosis process, symptom management, fertility and pregnancy, and national insurance. The results of the survey, based on reports from 1,912 women diagnosed with endometriosis aged 13-66, constitute the only knowledge base regarding the state of the condition in Israel.

In this current survey, which consists of four sections and a summary, we aim to examine trends of change in some of the issues that were explored in the first survey and deepen the knowledge on missing issues. The average time to complete the full survey is approximately 20 minutes.

You can stop filling out the survey at any time without providing a reason, and you may skip certain sections.

The survey is anonymous, and confidentiality regarding the identity of participants is guaranteed at all stages, including in the publication of the findings.

We have included a link to the association's page, which contains a wealth of information about the disease and how to manage it:

<https://endoisrael.org/>

We also invite you to join the association's community for the parents of patients.

Here is the link to the registration form:
